

BizLink Sunbolts is ranked 2nd out of 14 UL-listed PV connector companies who participated in 2011 lockable connector tests conducted by PHOTON Laboratory.

The ranking is published in 2011 Sept. issue of PHOTON International following the most stringent and punishing PV connectors tests they have conducted to-date. Sunbolts connectors have outperformed other competitors in many categories, earning editorial comments like "...absurdly high insulation.." for our 289 GΩ water resistance. PHOTON's detailed and favorable report on our Firm-Grip connector is an objective testament to the quality and reliability of our product. Please contact us for more information on our connectors and other PV interconnect products.
